devDependencies	vite@4.5.0	vite@5.0.0
keywords	(not specified)	[]
author	(not specified)	""
license	(not specified)	ISC

Key Differences

- **Versioning:** The new project uses semantic versioning (1.0.0) and includes metadata like **description**, **main**, and **license**.
- **Scripts:** The new project adds a **preview** script for production preview.
- **Dependencies:** The first project includes **postprocessing**, which is missing in the new setup.
- **Vite Version:** Updated from 4.5.0 to 5.0.0.
